

20. Assigning and Customizing LearnSmart

LearnSmart is interactive technology that provides adaptive questions to students and then presents the pages of the textbook with a highlighting system showing students where to focus their studies. Students can do Self-Study on their own or a teacher can assign and receive reports on the student progress. This guide provides the steps for assigning and customizing the chapters of LearnSmart.

1. Click on the **LearnSmart** tab.

2. Click on the black icon **LearnSmart Social Studies**.

3. The Section List which appears shows all classes that have been set up in ConnectED. Click on **Assign** in the same row of the class you wish to assign LearnSmart.

NOTE – Teachers are **NEVER** to click Add a New Section as this will upset the system. Also, while there is a column labeled Edit on the Section List page, teachers **SHOULD NOT** choose as an option to edit classes. If teachers want to edit a class, they should do it from the Teacher's Home page under Manage and Assign.

4. Follow the prompts on the screen:
 - a. Section Dates - set the deadline for the course. This will automatically span all the chapters of LearnSmart through the start date and end date of the course.
 - b. Time per module – Modify the amount of time covered in each module by adjusting the slider.
 - c. Modules – These are the chapters of the text. Teachers can deselect specific chapters.
 - d. Customize - Teachers can also click **Customize** to deselect specific lessons from a chapter. Teachers can also alter start dates and due dates as well as the amount of time a student is to spend in that chapter. By lowering the time, teachers lower the amount of questions a student will see in a chapter.
 - e. Click **Done** when finished.

A Section dates

Start: 3/29
End: 8/31

B Modify the depth of content covered in each module by adjusting the slider

Shallow Deep

52 min
Avg. time required per module

C Module
