

## 21. Accessing Reports in LearnSmart

LearnSmart is interactive technology that provides adaptive questions to students and then presents the pages of the textbook with a highlighting system showing students where to focus their studies. Students can do Self-Study on their own or a teacher can assign and receive reports on the student's progress. This guide will provide the steps for accessing multiple reports generated by LearnSmart.

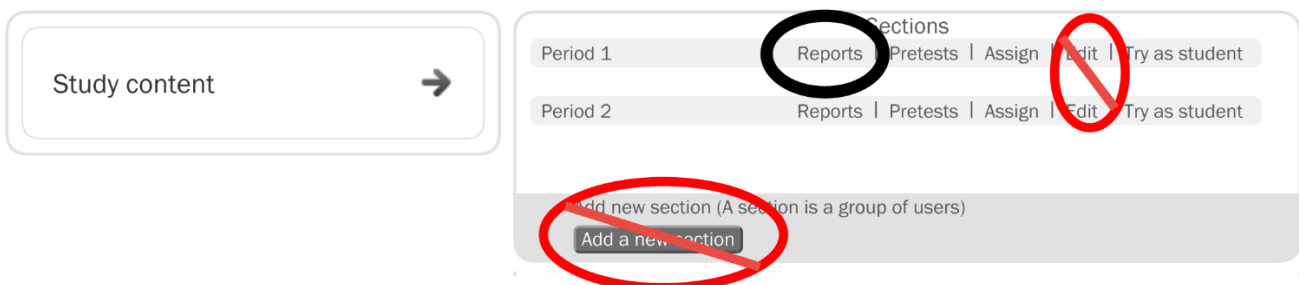

1. Click on the **LearnSmart** tab.

2. Click on the black icon **LearnSmart Social Studies**.

3. The Section List which appears shows all classes that have been set up in ConnectED. Click on **Reports** for the class you wish to view in LearnSmart.

**NOTE:** Teachers are **NEVER** to click Add a New Section or Edit as this will upset the system.

4. There are seven different reports available to the teacher. Each report has an explanation written just below it. As the students complete assigned LearnSmart chapters, data will automatically be entered into the reports.

## Reports for section: **Period 3**

### Progress Overview ▶

View student progress broken down by module.

---

### Student Details ▶

View student progress details plus completion level breakdown for each module.

---

### Module Details ▶

View information on how your class performed on each section of their assigned modules.

---

### Missed Questions ▶

View frequently missed questions.

---

### Metacognitive Skills ▶

View statistics on how knowledgeable your students are about their own comprehension and learning.

---

### Most Challenging Learning Objectives ▶

View the most challenging learning objectives.

---

### Pretest Results ▶

This gives you a quick overview of the pretest results for your students.

**NOTE** – Students also have reports they can see to monitor their own progress. The reports students see are specific only to that student.
